PROJECTS

TrendFeet
E-commerce Website

- Developed an e-commerce platform featuring top products from Nike, Puma, and Adidas.
- Built the frontend using HTML, CSS, JavaScript, and utilized Firebase for real-time data management.
- Implemented features such as authentication, cart functionality, and order placement, with a redirect button linking to the official brand websites for product purchases..
- Deployment Link: TrendFeet

Expense Tracker
Personal Finance Management Web App

- Developed a simple expense tracker web app to track expenses and manage balance in real-time.
- Built the frontend using HTML, Tailwind CSS, and JavaScript, with data stored in localStorage for persistence.
- Implemented features allowing users to input expenses, view balance, and edit the balance at any time.
- Deployment Link: ExpenseTracker

Recipe Book
Recipe Management Web App

- Developed a Recipe Book web app using React.js to allow users to browse, search, and manage recipes.
- Fetched recipe data from a public API and displayed dynamic recipe content with features for adding, editing, and deleting recipes.
- Deployment Link: RecipeBook

HOBBIES

- **Digital Art**
- **Swimming**
